

## Company Overview

Developed as Porous and Electric Charged Material for next generation

**E** Multi-Functional Material Recycled from Waste Materials  
CircuLite: Chemical Compound of Crystalline Aluminosilicate  
**nvironmental Solution Technology**

For future generations

Presenter: Sean Shunsuke Kumagai

Environmental Counselor: Ministry of Environmental of Japan 🇯🇵

 Sion Corporation

Our Basic Concept: 3R as Venous Industrial for next generation

We move to tap transformative power of science, technology and innovation to achieve Sustainable Development Goals.

**Reduce**

Reduce **Waste Ashes**

CircuLite

Recycled as Raw Material

There is no method to

landfill the Waste Ashes Safety

**3R**

**Reuse**

**Recycle: Technology**

Recycled Material

Contribute to **Environment**

Recycled Waste Ashes to

**Multi-Functional Material**

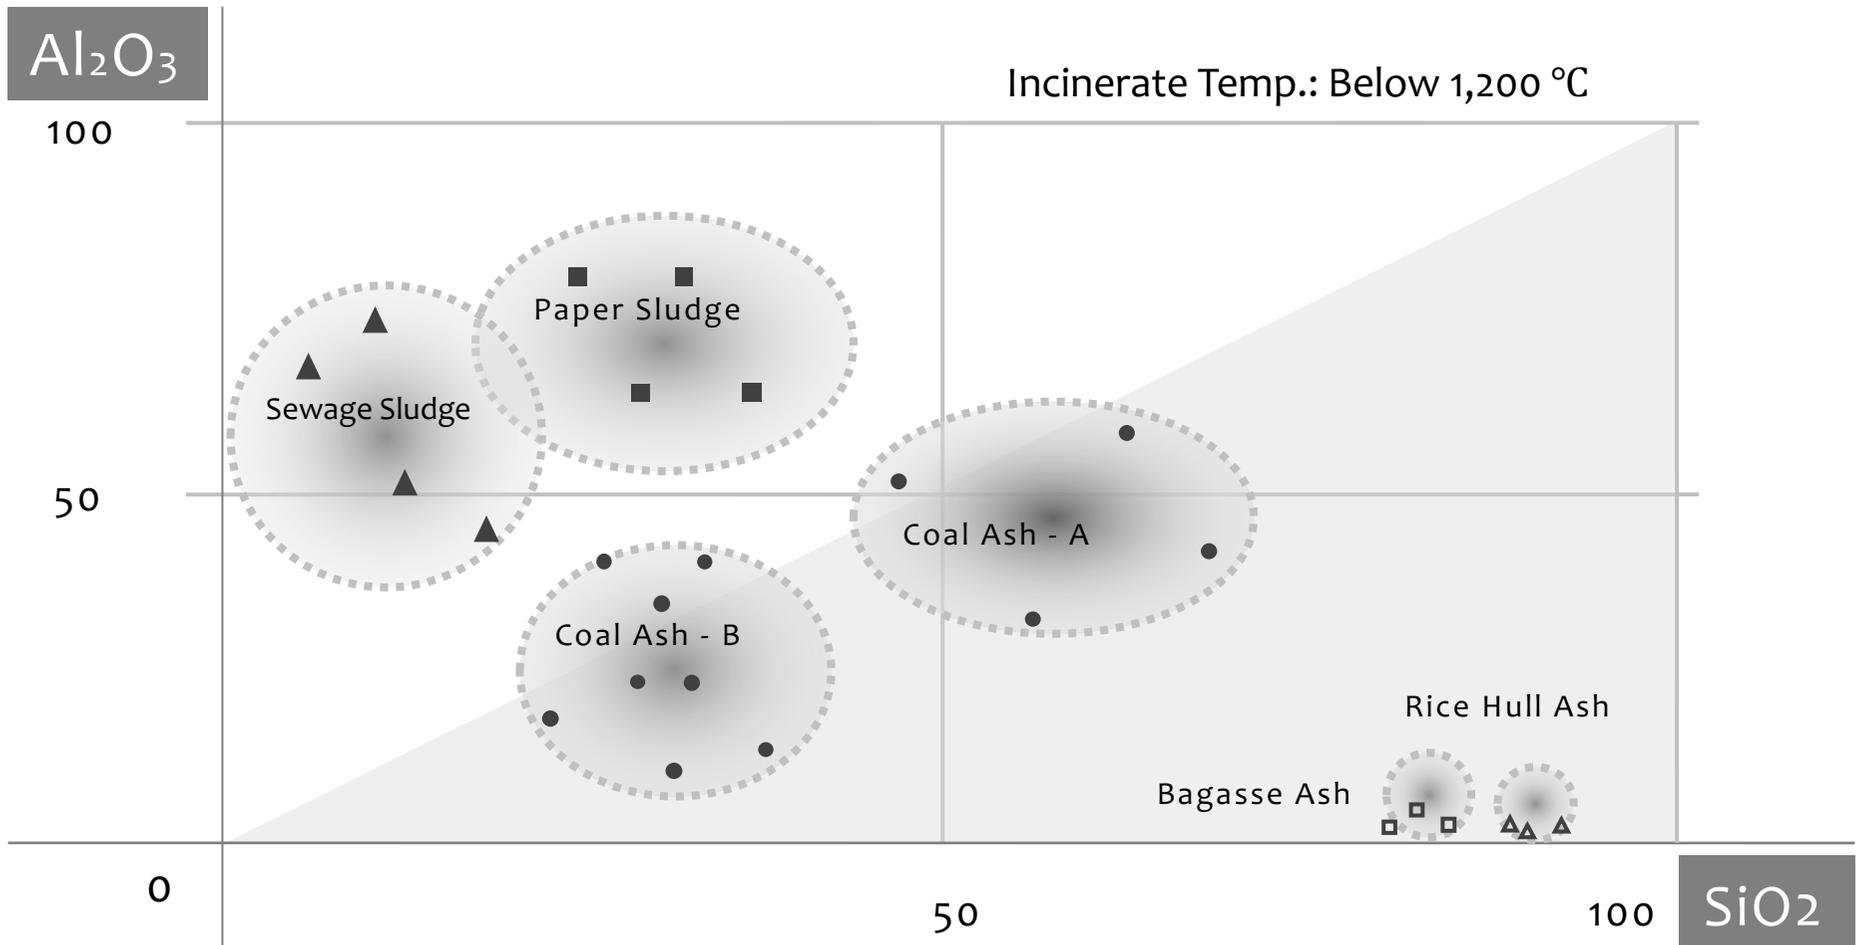

**Solutions Business** all over the world

# Section-01

Introduce outline of our Skill and Products

## 1-2. Technical Outline: Main Components of various Carbide, Ash as raw material of CircuLite

### 1-3. Application Technology – Available types of Raw Materials as CircuLite

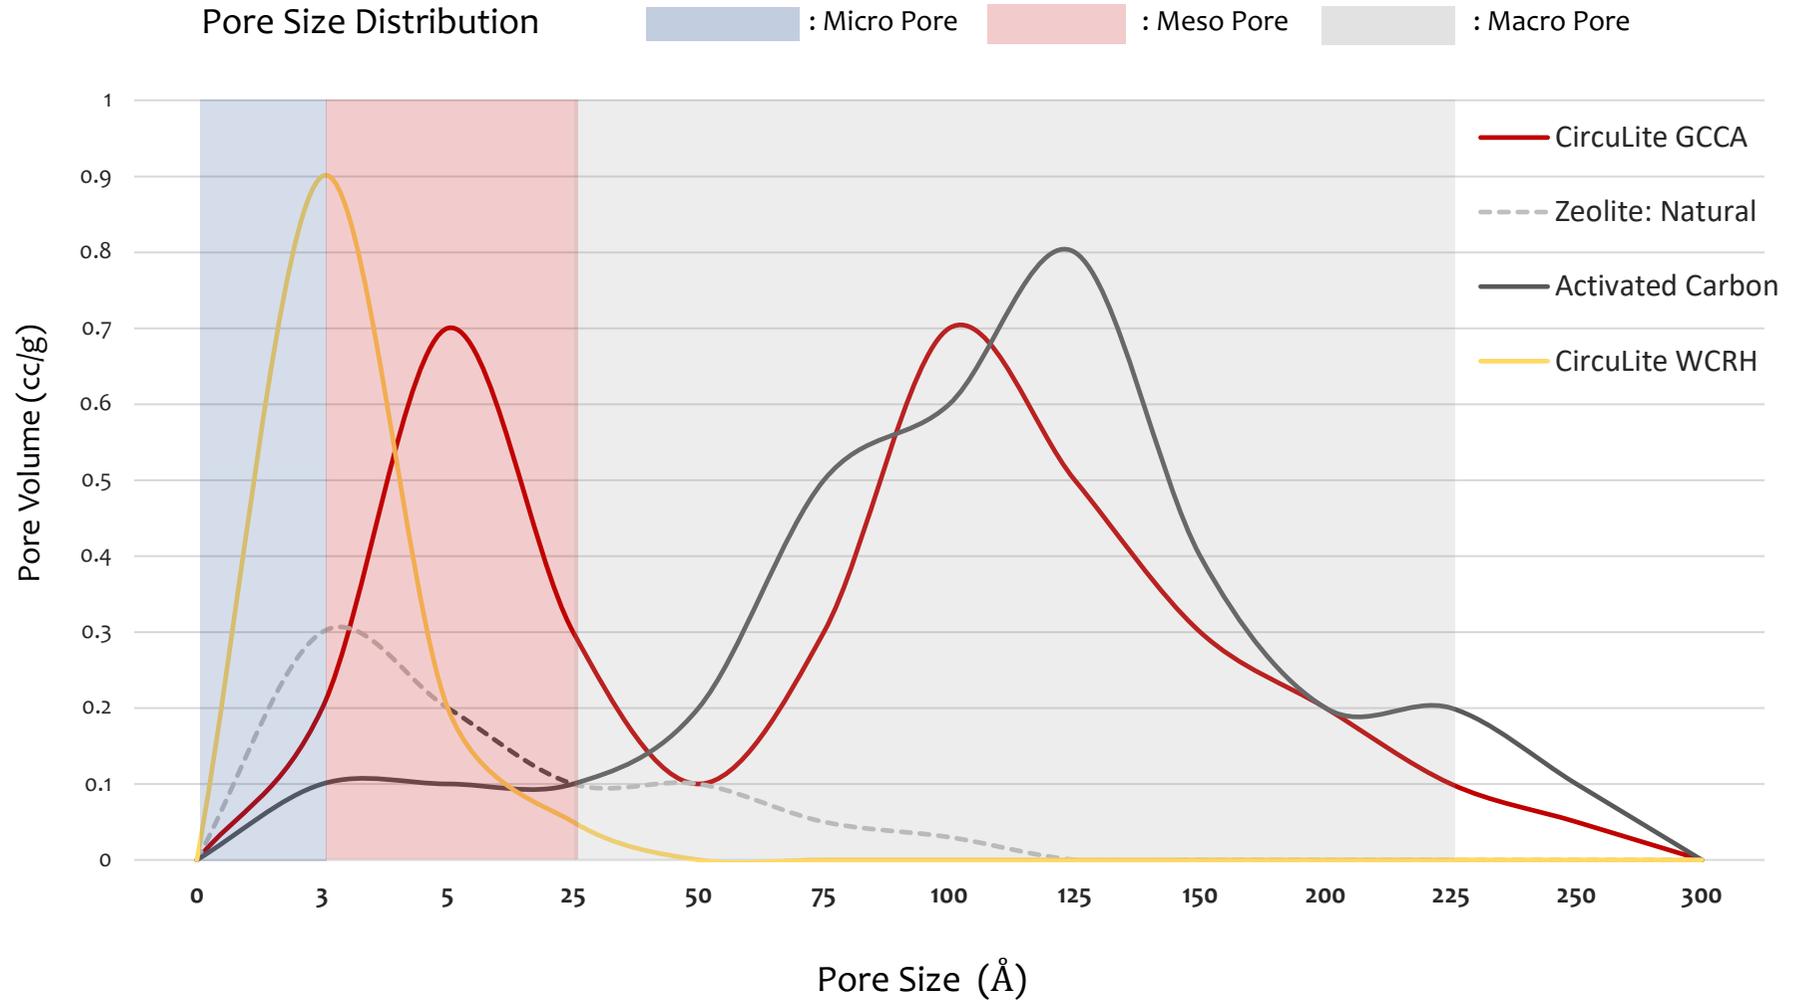

1.	Unused Materials	Coal Ash	Rice Husk Carbide or Ash	Bagasse Carbide or Ash
2.	Producer	- Power Plant	- Biomass Power Plant	- Biomass Power Plant
3.	Main Components	- Silicon, Aluminum	- Silicon	- Silicon
4.	Classification	Fossil Fuel	Renewable Energy	Renewable Energy
5.	Combustion Temp	approx. 1,000 °C	approx. 800 °C	approx. 750 °C
7.	Appearance			
<p>*Note-01: We can recycle from various Waste Materials to Multi-Functional Material: CircuLite</p> <p>*Note-02: We have a technology to remove the Toxic Materials, Heavy Metals from Coal Ash. Therefore, you can expand the Market for Sustainable, Recycling-Based Society for achieving Goals of SGDs and Next Generations.</p>				

## 2-1. Technical Data: Comparison table: Performance

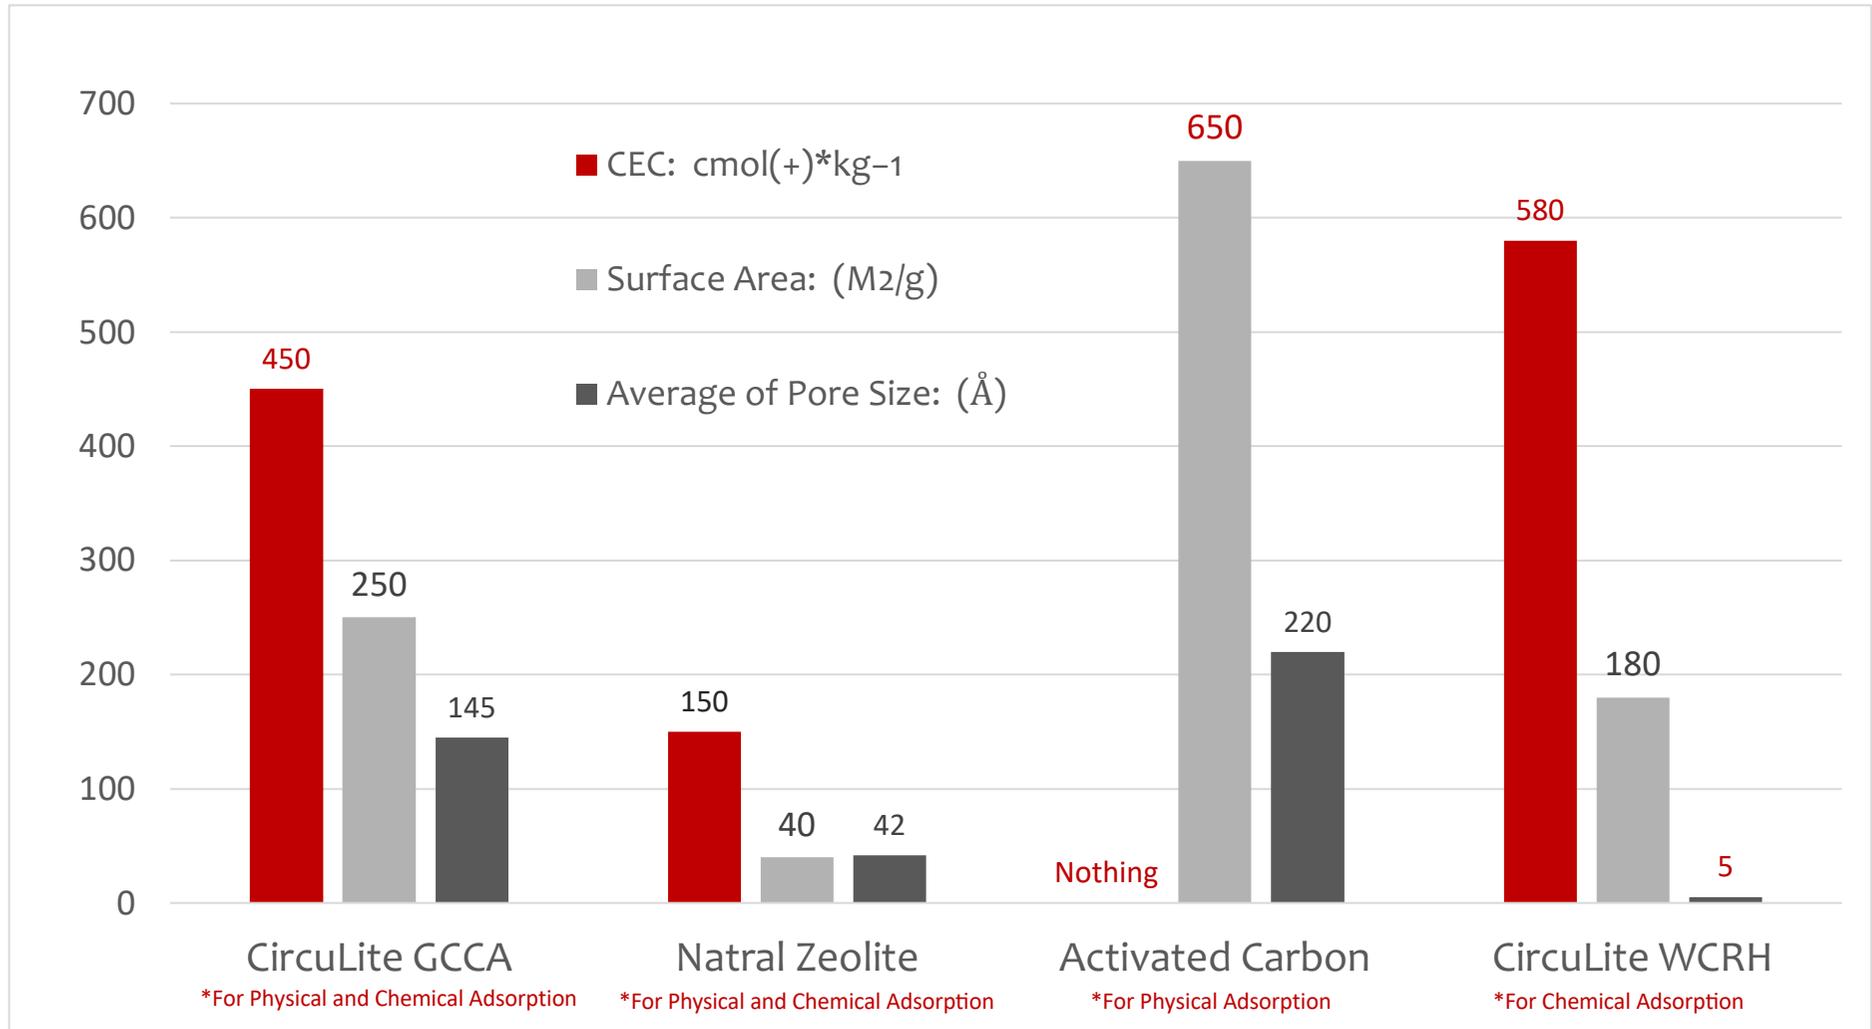

No.	Item /Material	CircuLite Recycled Material	Zeolite (Natural)	Zeolite (Synthesis)	Activated Carbon Standard Product
01	CEC [cmol(+) kg <sup>-1</sup> ] *Ion Exchange Capacity	300 ~ 600	200 ~ 250	200 ~ 600	nothing
02	Surface Area (cm <sup>2</sup> /g)	100 ~ 400	20 ~ 120	80 ~ 200	300 ~ 800
03	Particle Size (mm)	0.003 ~ 0.100	0.001 ~ 2.000	0.002 ~ 0.010	0.1 ~ 20
04	Pore Size, Range (nm)	0.3 ~ 2.5 Micro, Meso, Macro	0.2 ~ 0.3 Micro	0.3 ~ 0.15 Micro	1.0 ~ 3.0 Micro, Meso, Macro
05	Electric Charge (Cation or Anion)	(+) (-)	(-)	(-)	Nothing
06	Oil Absorption Capacity (Against Own Weight: %)	55 - 65	15 - 18	8 - 15	22 - 34
07	Price (US\$/ton)	Depend on Production Scale	200 ~ 300	400 ~ 1,000	300 ~ 800

## 2-2. Technical Data: Comparison table : Pore Size Distribution

## 2-3. Technical Data: Comparison of Performance among similarly materials as Adsorbent

### 3-1. Application Technology: Types of Products of Recycled Products: CircuLite

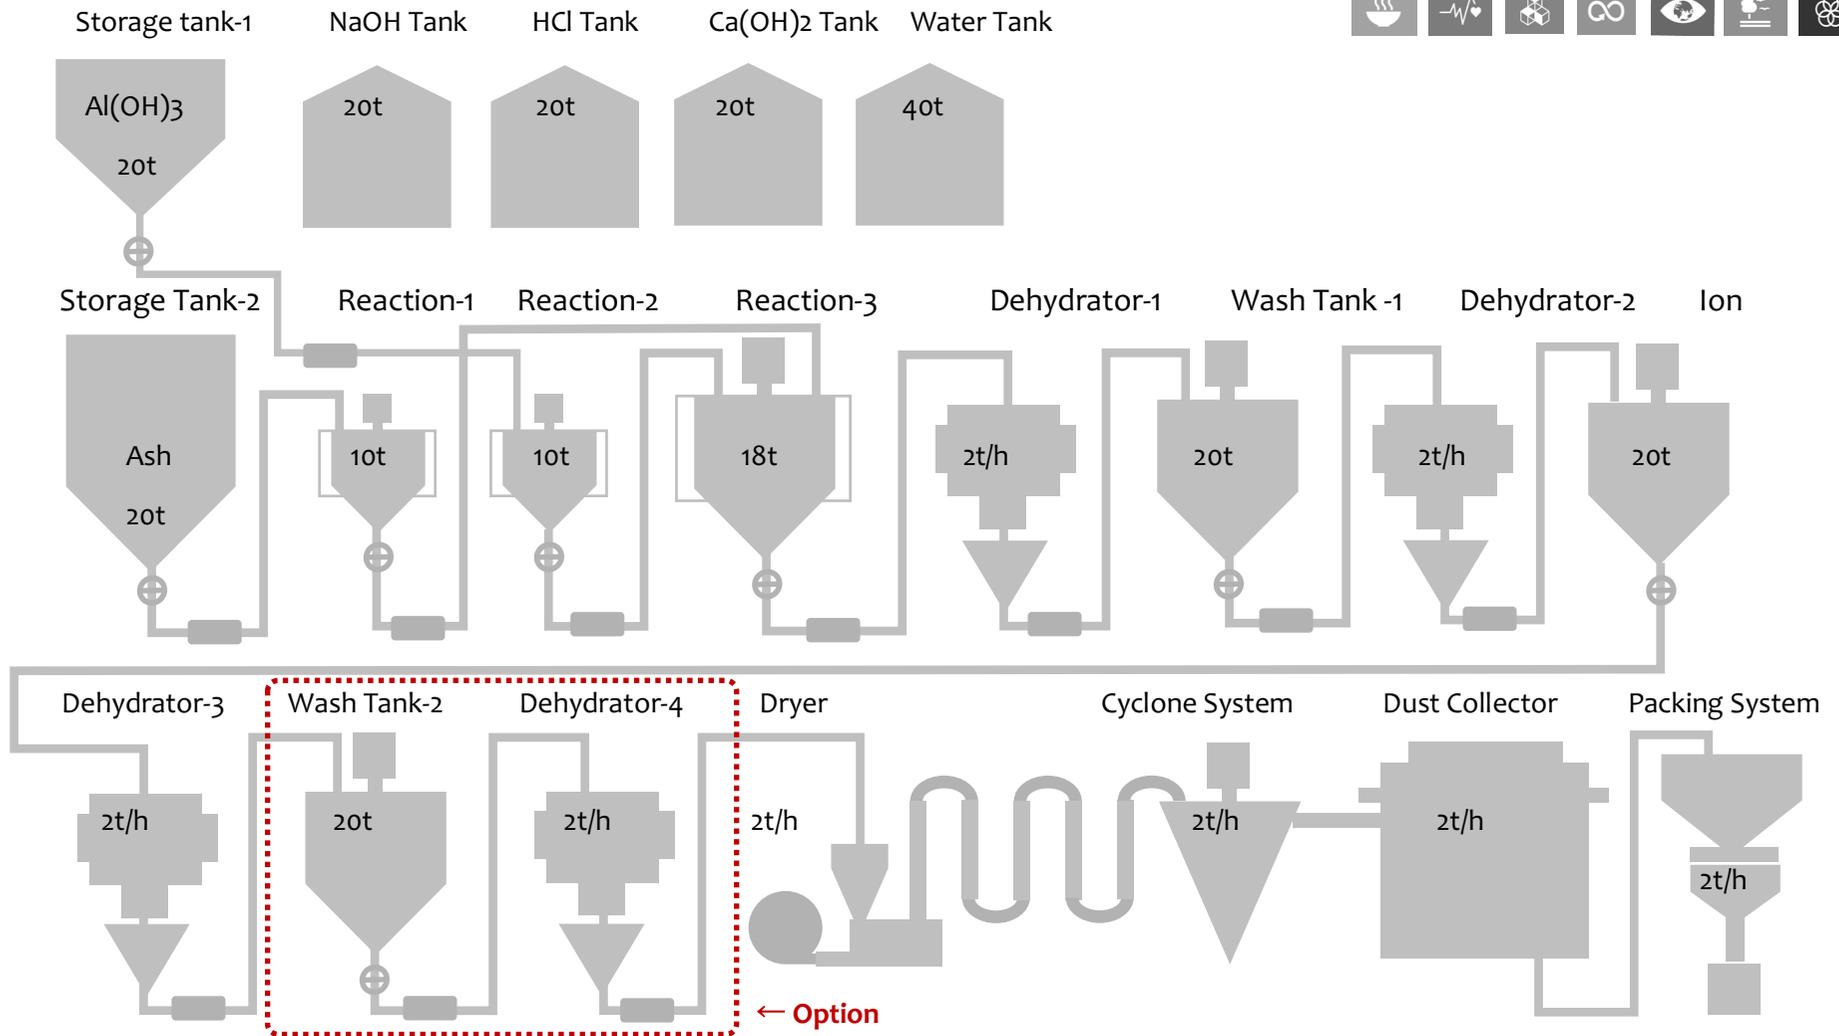

1.	Raw Material	Coal Ash, Rice Husk Ash, etc.	Rice Husk Ash, Coal Ash, etc.	Rice Husk Ash, Coal Ash, etc.
2.	Field	- Industrial	- Toxic Gas Remover	- Agriculture
3.	Application	- Wastewater Treatment - Heat Insulation Coating: *Paint - Storage for Battery: *Porous	- Toxic Gas Adsorbent - Removing Heavy Metals - Removing Toxic Materials	- Soil Optimization - Prevent Desertification - Amend Poor Soils
4.	Feature	- ION Exchanger - White Color: for Cosmetic, Medical, Tooth Powder, etc.	- Physical Adsorption: Porous - Chemical Adsorption: Ion <sup>+</sup> - Substitute for Activated Carbon	- Soil Conditioner - Prevent Desertification - For Economic Agriculture
5.	Price	High Price: White Color	Middle Price: Gray Color	Low Price: Black Color
6.	Appearance	 <p>e.g., Coal Ash Based, etc.</p>	 <p>e.g., Rice Husk Ash Based, etc.</p>	 <p>e.g., Rice Husk Ash Based etc.</p>
<p>*Color Variation</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> White</li> <li><input type="checkbox"/> Grey</li> <li><input type="checkbox"/> Black</li> </ul>				
<p>*Note: We can recycle from various Waste Materials to Multi-Functional Material: CircuLite</p>				

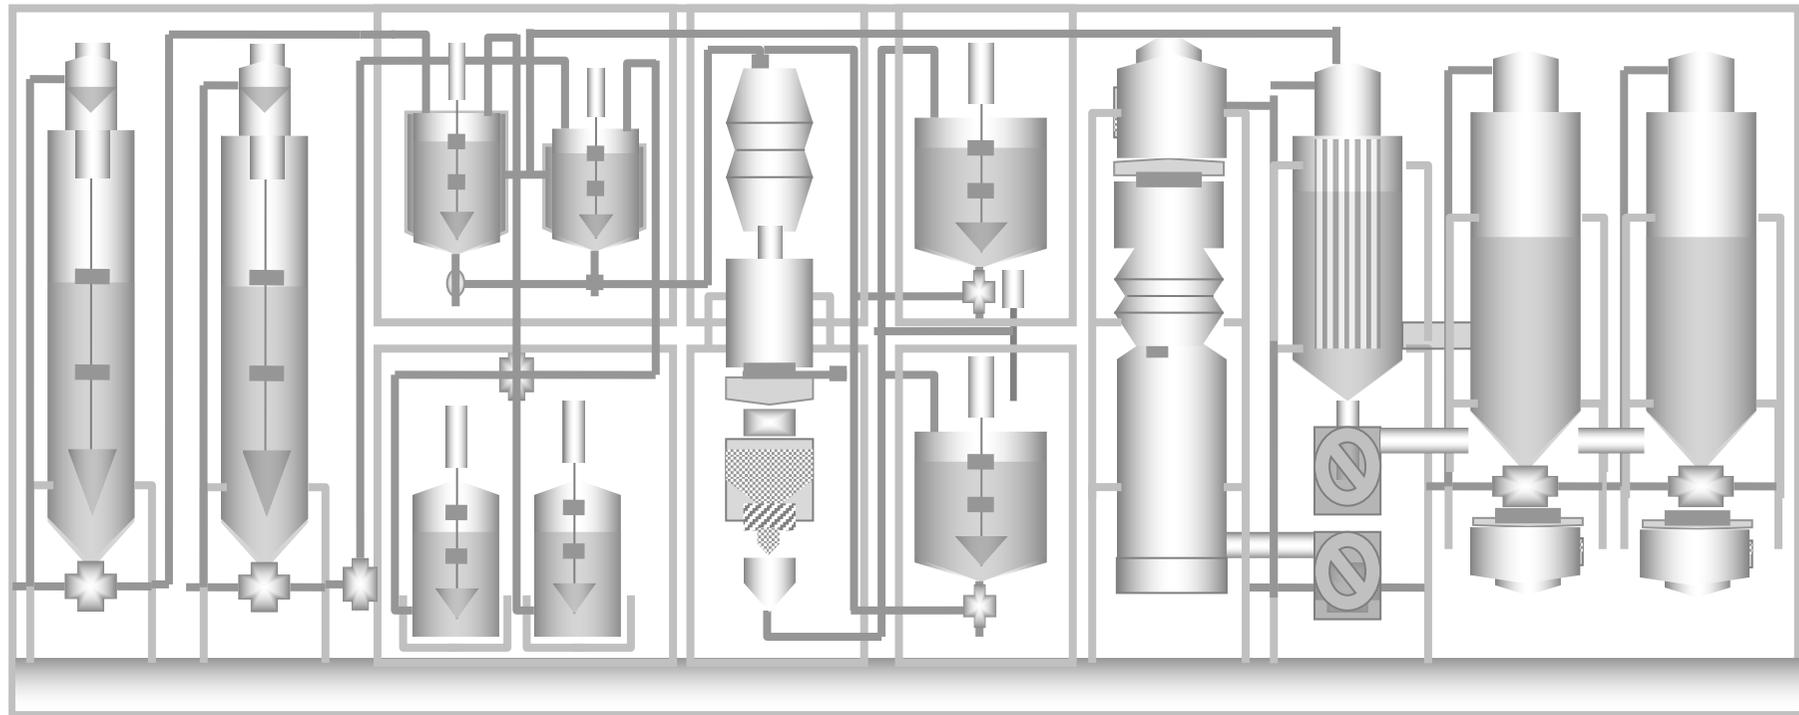

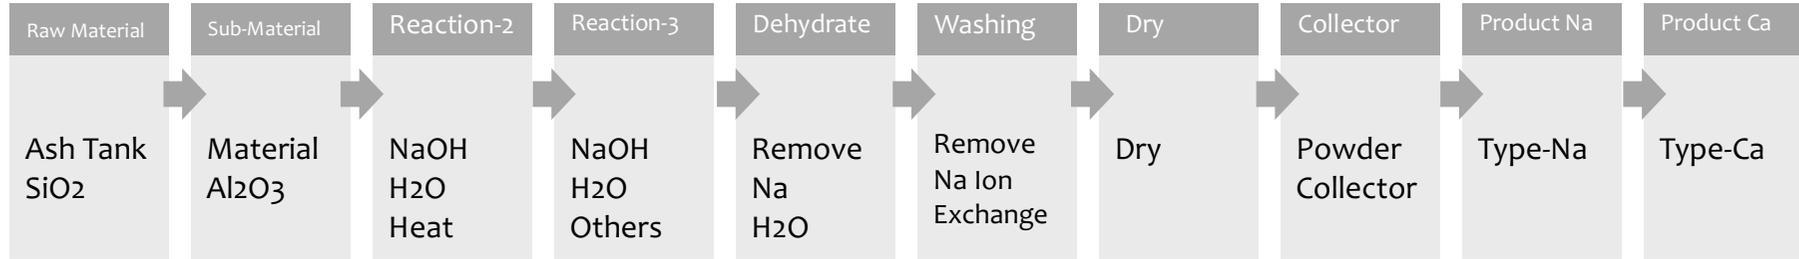

# Section-02

## Introduce our Technology

# 5-1. Outline of CircuLite Manufacturing Process

## 5-2. Outline Equipment for processing of CircuLite

# 5-3. CircuLite Manufacturing Equipment

Track Record: Case - Raw Material: Rice Husk

Combustion furnace

First Reaction Tank A, B

3<sup>rd</sup>. Main Reaction Tank

Dehydrator-1

Dehydrator-2

Slurry Plumbing System

Dryer + Power Collector

Electrical Control

# Section-03

## Introduce Application of CircuLite

## 6-1. Application Table of CircuLite

No.	Category	Daily Uses	Industrial Uses	Public Uses
1.	Chemical Adsorption [CEC]	<ul style="list-style-type: none"> <li>• Water Softeners: Detergent</li> <li>• Water Purifiers: For Drink</li> <li>• Detergent: Softening</li> <li>• For aquarium Fish</li> </ul>	<ul style="list-style-type: none"> <li>• Industrial Waste Water: (Heavy Metal, COD, BOD, Oil.etc.)</li> <li>• GOLF: Prevent elution Pesticide</li> <li>• Soil Conditioner: EC, pH, etc.</li> </ul>	<ul style="list-style-type: none"> <li>• River Purify: Concrete</li> <li>• Water Retaining for Asphalt</li> <li>• Farm of fish, shrimp</li> <li>• Polluted Soil: Heavy-Metals, Oil etc.</li> </ul>
2.	Physical Adsorption [Porous]	<ul style="list-style-type: none"> <li>• Deodorant: Restroom</li> <li>• Air Purifier (HITACHI)</li> <li>• Dehumidification: Room</li> <li>• Cosmetics</li> </ul>	<ul style="list-style-type: none"> <li>• Deodorant for Industrial</li> <li>• Remover of Harmful Gases</li> <li>• Oil Adsorbent: case of emergency</li> <li>• Breeding Feed: Intestine function</li> </ul>	<ul style="list-style-type: none"> <li>• Soil Decontamination: Cs (Fukushima Radioactive)</li> <li>• Asphalt: <ul style="list-style-type: none"> <li>- Permeability</li> <li>- Prevent Heat Island Phenomenon</li> <li>- Prevent Track Digging</li> </ul> </li> </ul>
3.	Microbe [Bacterium] [Anti-Virus]	<ul style="list-style-type: none"> <li>• Soil amend for Gardening</li> <li>• Fermentation Accelerator</li> <li>• Water Retaining</li> <li>• Air Purifier: Anti-Virus</li> <li>• Mask – Filtration, Anti-Virus</li> </ul>	<ul style="list-style-type: none"> <li>• Bio Reactor: Microbe Proliferation</li> <li>• Soil Amendment: Agrochemical</li> <li>• Ferment for Compost</li> <li>• Feed : Cattle, Pig, Chicken</li> <li>• Feed of farm : Fish, Shrimp</li> </ul>	<ul style="list-style-type: none"> <li>• Purify of pond, river, sea</li> <li>• River Biological Diversity</li> <li>• Biological Reactor</li> </ul>
4.	Impregnation	<ul style="list-style-type: none"> <li>• Aromatherapy (Anti-Virus)</li> </ul>	<ul style="list-style-type: none"> <li>• Secondary Products : Paint, Fabric</li> </ul>	<ul style="list-style-type: none"> <li>• Insect Proof: Mosquito, Mite</li> </ul>
5.	Education	<ul style="list-style-type: none"> <li>• Environmental Study</li> </ul>	<ul style="list-style-type: none"> <li>• Study environmental science</li> </ul>	<ul style="list-style-type: none"> <li>• Environmental Research</li> </ul>

## 6-2. Application: Agriculture - Improving degraded soil by CircuLite

* Comparative Test : Elution amount of Nutrient Compositions from Soil and its Growth				No. 11-08-0006	
* Test site : Tomori, Miyako Island, Okinawa, Japan			* Soil Classification : Shimajiri Soil		September 08, 2011
* Testing Object : Bitter gourd			* Test Sample : CircuLite BCaRH		S. Kumagai : Sean Inc.
Analysis item	Unit	Blank	Addition	Elution amount of Nutrient Compositions from Soil	
1.	pH	-	4.5	6.60	
2.	NH <sub>3</sub>	mg/L	11.0	0.20	
3.	NO <sub>2</sub>	mg/L	1.5	0.02	
4.	NO <sub>3</sub>	mg/L	0.2	0.02	
5.	Salt	mg/L	50.0	5.00	
6.	P	mg/L	0.5	0.02	
7.	Ca	mg/L	17.0	0.30	
8.	EC	mS/cm	1.8	0.51	

Nutrient	Before (mg/L)	After (mg/L)
EC	1.8	0.51
NO <sub>2</sub>	1.5	0.02
NO <sub>3</sub>	0.2	0.02
P	0.5	0.02
pH	4.5	6.6
Ca	17	0.3
NH <sub>3</sub>	11	0.2
Salt	50	5

**Initiative** : ICT Agricultural Circular Economy System by Recycled Functional Material: **CircuLite**

To Provide Composite Agricultural Impacts and Rational System : As a Venous Industry  
 ICT Administrative Agri-Factory Systems by recycled Local Waste

The time has come to put into practice this Agricultural Circular Economy System as applying one of the technologies is implemented in reality, we believe that you can get **ICT Sustainable Agricultural System, Safety Foods and Water, Food Steady Supply, Greening to absorb CO<sub>2</sub>, and Zero Hunger**. That is our hope and **Mission** even the little help we can do with Love.

Reusing of Plant Residue as a raw material: **CircuLite**

Green Circulation

**A**  
 Solve the Local Issues  
 By Recycled Local Waste  
 Utilized Local resources for solutions in Local area

**B**  
 Prevent  
 Transfer Coefficient  
 Pesticide, Heavy Metals,  
 Radioactive Substances

**C**  
 Ground Water  
 Contamination Control  
 Nitrate Nitrogen, Pesticide,  
 Heavy Metals, etc.

# 6-4. Application: Soil Decontaminate Test: Radioactivity Contaminated Soil

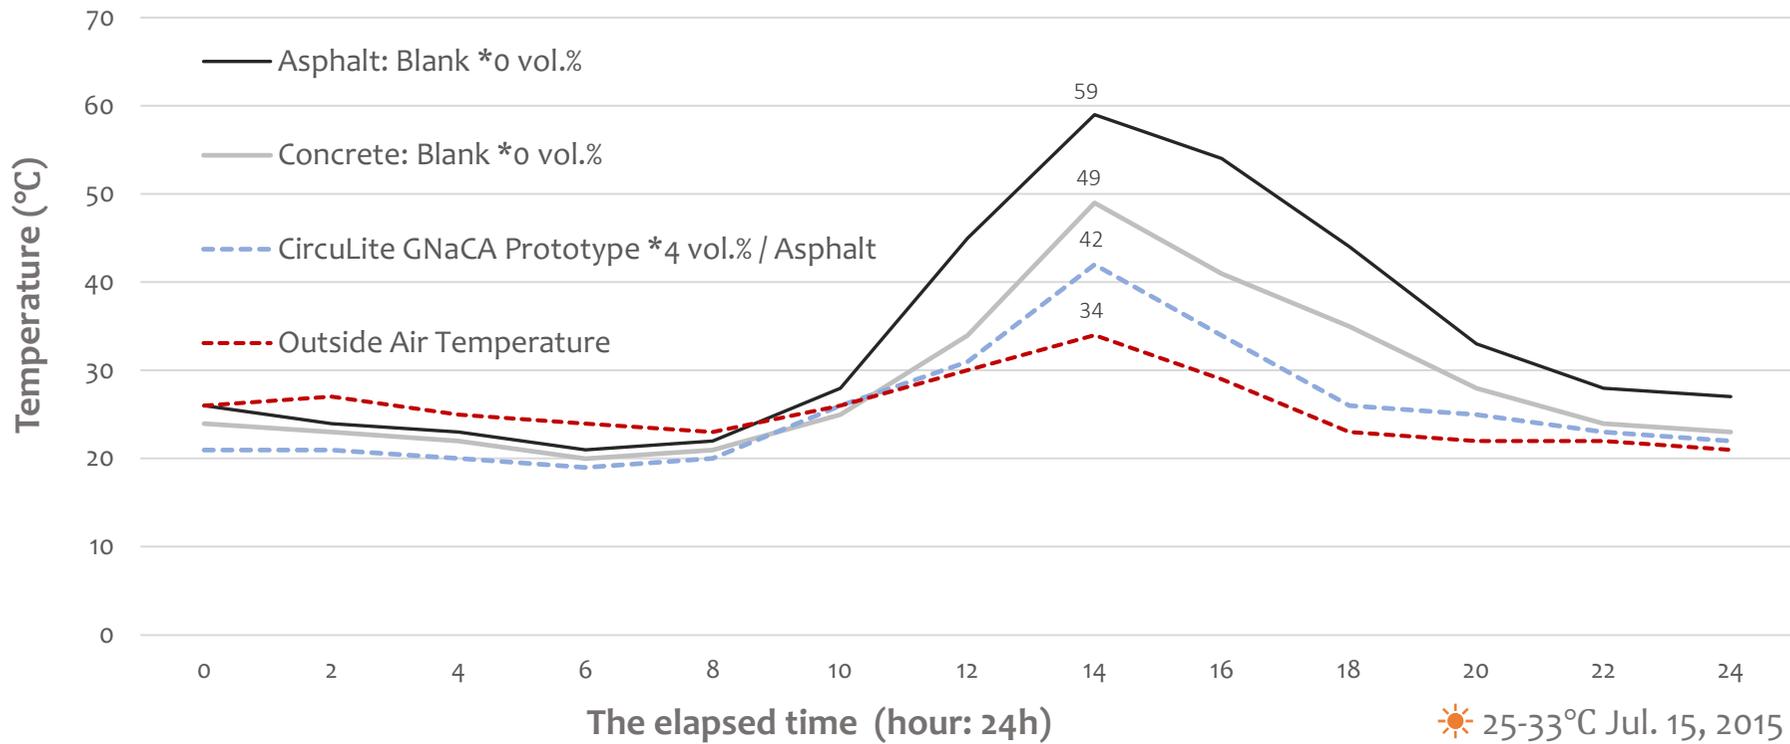

\* Testing Object : Bitter gourd \* Test Sample : CircuLite BCaRH \* Contaminated Material: Cs-134, Cs-137

Test of Effect EC of contaminated soil	Test of crop growth for add CircuLite	Test of Adsorptive immobilization: Cs

## 6-5. Application: Change of temperature of Surface on the Road Bed Materials

Change of temperature test: Surface on the road bed materials

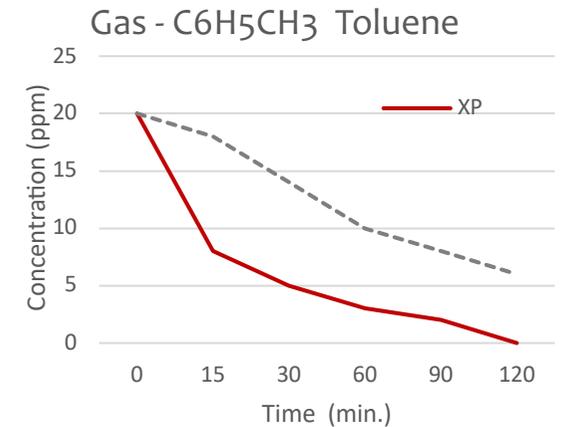

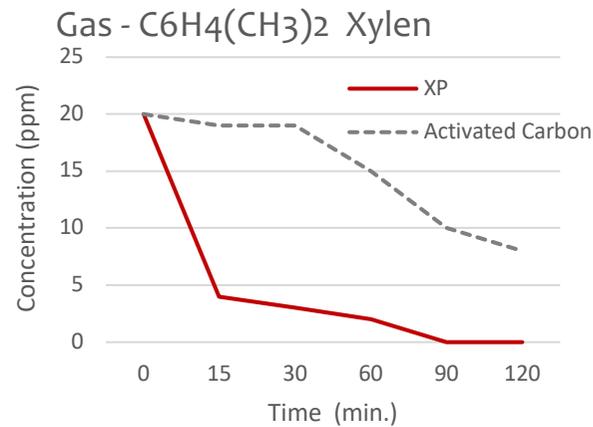

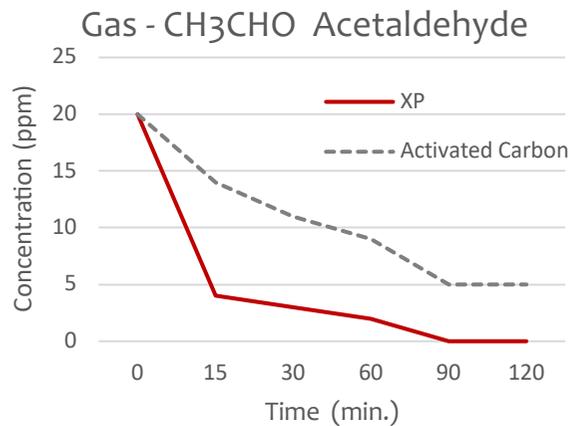

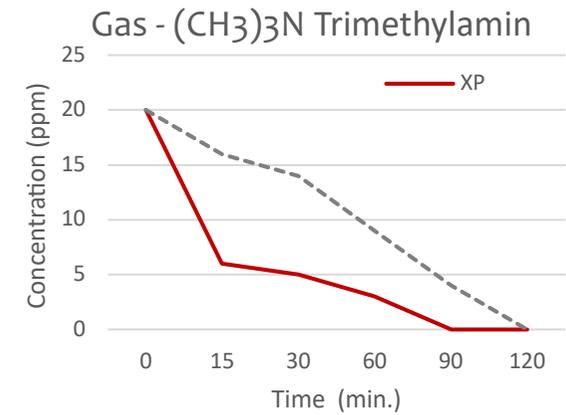

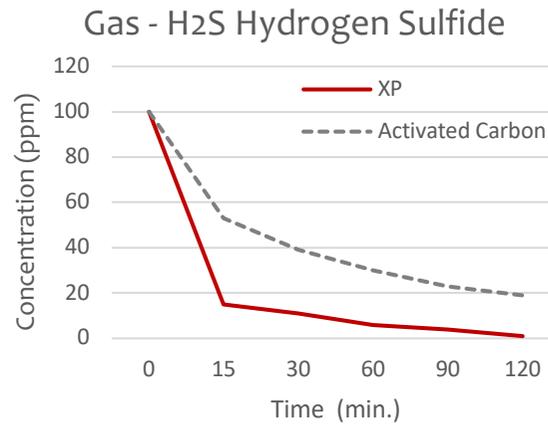

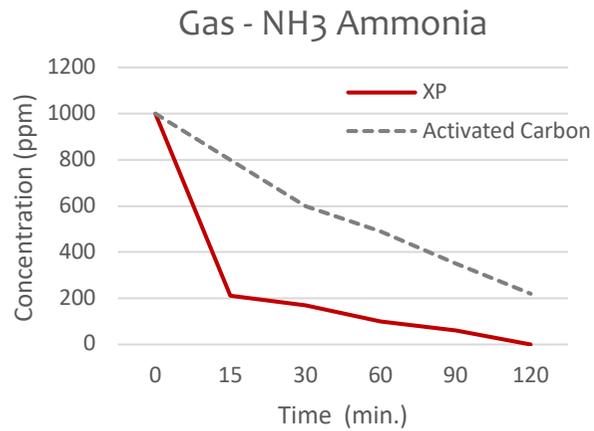

Keyword : Porous, Water holding property, Heat of vaporization, Heat island phenomenon

## 6-6. Application : Harmful substances and Toxic Gas Removal System for Industry.

Appearance of Removal System	Removable substances and gas by CircuLite		
	No.	Case: Object Toxic Gases	
	1.	Ammonia	Chemical Formula
	2.	Methyl Mercaptan	NH <sub>3</sub>
	3.	Hydrogen Sulfide	CH <sub>4</sub> S
	4.	Methyl Sulfide	H <sub>2</sub> S
	5.	Trimethylamine	C <sub>2</sub> H <sub>6</sub> S
	6.	Acetaldehyde	C <sub>3</sub> H <sub>9</sub> N
	7.	Styrene	C <sub>2</sub> H <sub>4</sub> O
	8.	Phenol	C <sub>8</sub> H <sub>8</sub>
	9.	TDI: Toluene Diisocyanate	C <sub>6</sub> H <sub>6</sub> O
	10.	MDI: Methylenediphenyldiisocyanate	C <sub>9</sub> H <sub>6</sub> N <sub>2</sub> O <sub>2</sub>
	11.	Toluene	C <sub>15</sub> H <sub>10</sub> N <sub>2</sub> O <sub>2</sub>
	12.	Xylene	C <sub>7</sub> H <sub>8</sub>
	13.	Acetaldehyde	(CH <sub>3</sub> ) <sub>2</sub> C <sub>6</sub> H <sub>4</sub>
	14.	Sulfur Dioxide	C <sub>2</sub> H <sub>4</sub> O
	15.	Carbon Monoxide	SO <sub>2</sub>
	16.	<b>Oil Mist</b>	<b>Fuel Oil, Lubricating Oil, Hydraulic Oil</b>
	17.	Fume	Compound of Pb, Hg, Cd, Cu
18.	VOCs	Volatile Organic Compound Group	
<p>*CircuLite Market is increasing as Industrial Adsorbent in over than seven hundred factories in the world.</p>			

## 6-7. Application: Odor Deodorant & Purify in Industrial Field

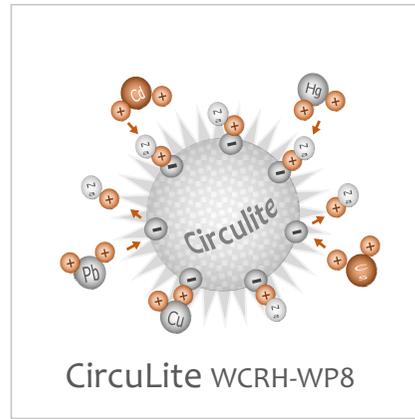

## 6-8. Application : Wastewater Purification in Industrial Field

CircuLite WCRH-WP8

Enlarged Figure

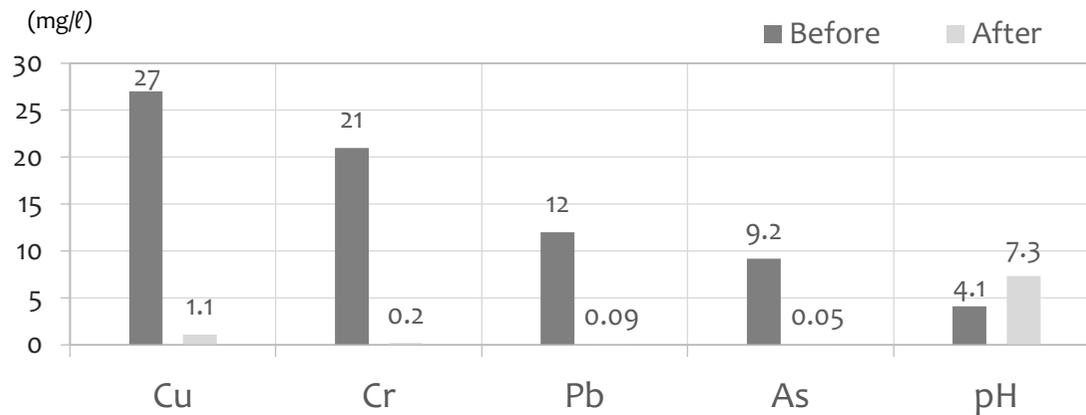

Before

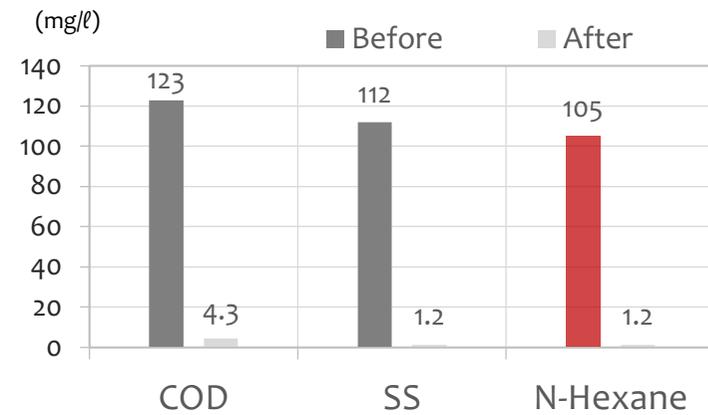

After

**Result: Waste Water Purification**  
By CircuLite WP-WCRH-WP8

**Result: Waste Water Purification**  
By CircuLite WP-WCRH-WP8

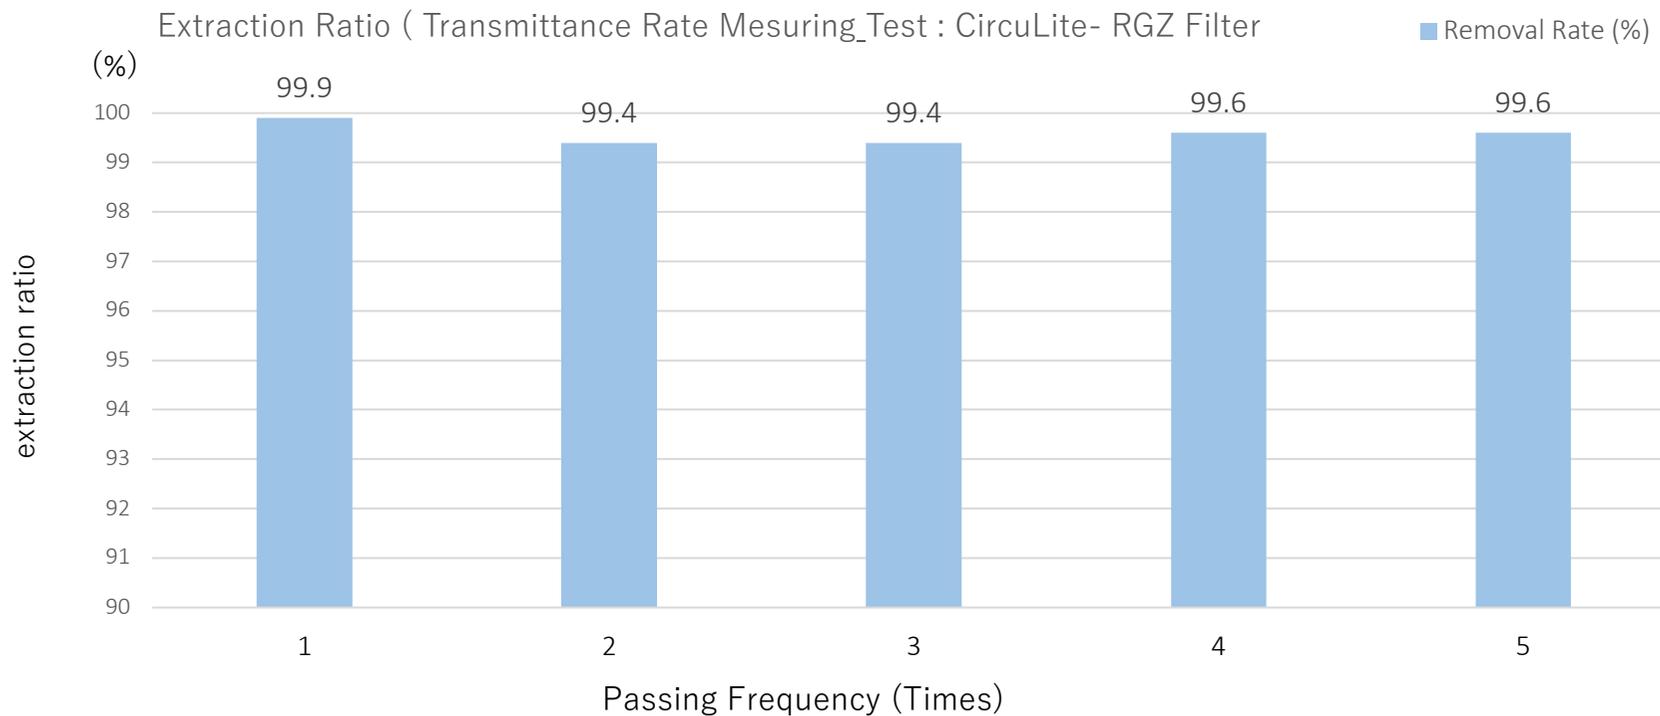

## 6-9. Application: Anti-Bacterial Material – Non-Woven Material with CircuLite – RGZ JIS K 3703-3:2008

\* Testing Object : **Staphylococcus Aureus** - JIS K 3703-3:2008

\* Test Sample : CircuLite RGZ \* Processing Material: Non-Woven Fabric with **CircuLite RGZ**

Test of Effect EC of contaminated soil

\*Analysis Method: CNS 14774 T5017-2011 9.2, CNS 14775 5017 – 2003, \*Test Area: 39.5 (cm<sup>2</sup>),

\* Average Particle Diameter: 2.8 (μm), \*

## 7-1. Procedure: About the Evaluation of this Business Potential by processing of graded steps

*	Sections	Action Matters		Evaluation items		2019												Expense Items (Unit: USD)		
						1	2	3	4	5	6	7	8	9	10	11	12

D	Phase - 4	*	Conclusion Technical Contract		Technical Transfer Fee, etc.											■				

## Introduction: Personal History

- NAME (Technical General Manager) : Shunsuke KUMAGAI - Live in Tokyo, Born in Fukuoka, Japan, raised in Nagano
- Registrare Qualification : Environmental Consultant – Registered by Department of Environment of Japan
- Academic Background
  1. Ehime Univ.: Agriculture Trainee Class - Synthesis of Functional Compound Material to utilize Residues.
  2. Waseda Univ.: Human Environmental Science Dept. - Global Environmental Science Subject.
- Main Career
  1. Practical Use 1. Circular Economy Business: Factory of Recycling Coal Ash Based (Chubu Electrical Power, Japan)
  2. Practical Use 2. Circular Economy Business: Factory of Recycling Rice Husk Ash Based (Fujian Province, China)
  3. Japan Forestry Agency - Hazardous Materials R&D Insect Pest Control (Subsidy of Research)
  4. Yokohama City Government - SBIR (Subsidy of Implementing – R&D Recycling of Sewage Sludge Ash)
  5. R&D Project 1: Purification of the type of Closed Water Area (Research Funds - Yokohama City Association)
  6. R&D Project 2: Dustproof & Anti-weed of Ground (Research Funds - Yokohama City Association)
  7. R&D Project 3: Purification of the type of Biodiversity of Closed Water Area (Research Funds - Yokohama City Association)
  8. R&D Project 4: R&D of Environmental Education Tools and Method (Research Funds - Gakken Holdings)
  9. R&D Project 5: Toxic Gases Removal Equipment for industrial (Collaborate R&D: AMANO, HITACHI, FUJITSU)
  10. R&D Project -5•Industrial Wastewater Treatment (Heavy Metal, Oil content)
  11. Research-1•Prevent method of Contaminate Underground Water for vicious circle of chemical elements from poor soils.
  12. Research-2•Improvement methods of Subsurface Soil Quality to adsorb the effective fertilizer from Red Soil. (Okinawa Pref.)
  13. Research-3•Developed New Materials to Recycle method of unused resources (Taiwan National Science Technology Univ.)
- Activities for Environment for SDGs
  1. Environmental Technology Transfer (Contribute for World Environmental Solutions) : Asia, US, etc. with UNIDO
  2. Decontamination of Fukushima: Water purification and Soil Decontamination, Volume Reduction (Ministry of Agriculture, Japan)
  3. Environmental Education for Developing countries: Solomon (Technical Personnel Dispatching - JICA)
  4. New Functional Materials recycling unused residues: R&D: International Patent Application within 2020.
  5. Registered Environmental Technology by UNIDO of United Nation.
  6. R&D: Pest Repellent for Mosquito, Mite, Leech, etc. (Collaboration Funds by Private Company)
  7. R&D: Recycling Method of Plant-Based Residues (Malawi, Côte d'Ivoire, Morocco, Hong Kong, Cambodia, Myanmar,)

# Thank you very much for your kind attention!
